

Portability at your Fingertips: Four Port USB Car Charger Available Today With Quick Charge 2.0 and Auto Detect Functionality.

For Immediate Release. January 15, 2014, Ann Arbor, Michigan. CHOETECH, one of the world's fastest growing wireless accessory companies, announced today, the release of the CHOETECH 4 Port USB Car Charger with Qualcomm Quick Charge 2.0 Technology. CHOETECH's "smart charging technology" enables users to charge devices with or without Quick Charge 2.0 embedded in them. Qualcomm's Quick Charge 2.0 technology provides a faster charge than traditional charging; and the CHOETECH 4 Port USB Car Charger comes with one port specifically dedicated to Quick Charge 2.0-enabled devices.

All four USB ports on the car charger have a unique auto-detection feature, which intelligently detects the type of product being charged, (iOS or Android). With auto-detect, each device is charged to its charging specifications. Although there is only one port with Quick Charge 2.0 technology on the charger, the other three ports will still charge your devices faster than ones with typical chargers. The CHOETECH 4 Port USB Car Charger has a total output of 51 watts and four ports, making this charger a lightweight and easy-to-use solution for anyone on the go.

Established in 2012, CHOETECH is committed to making life easier for device users. As one of the foremost companies researching and developing new charging technologies for all devices, CHOETECH offers a complete family of charging products, designed with both the device, and the user, in mind. Portability, technology, safety, and cost were significant concerns in the design and creation of the CHOETECH 4 Port USB Car Charger.

The CHOETECH charger eliminates user concerns about the all too common electrical issues related to charging. A short circuit protection feature enables safe charging. CHOETECH's over-heating, over-charging protection circuit means there's no risk of device damage due to unsteady voltage while charging in the car. Because CHOETECH uses top grade microchips in their chargers, all devices receive full power.

A market leader in device compatibility, CHOETECH's energy-efficient wireless chargers come in many shapes, sizes, and colors, so users can pick the charger that fits their phone.

CHOETECH backs their 4 Port USB Car Charger with a 12-month warranty and 24x7 customer support via email. Currently, the CHOETECH charger can be purchased at Amazon.com in the United States of America for \$23.99 USD.
